

REVOLUTIONARY CONNECTIONS FOR SPARK PLUGS AND SPARK PLUG CABLES

ABSTRACT : A construction for connecting a spark plug terminal (24) to a slotted (20) cable terminal (14). The construction is comprised of a cotter pin (12) and a plurality of concave cavities (10) which are built in the spark plug terminal (24), a spring clip (16) with a plurality of dimples (18) and a plurality of lateral thruholes (22) which are built in the slotted (20) cable terminal (14).
